EXPERIENCE AND PROJECTS

HANGMAN (2018)

A simple hangman game with user authentication and leaderboard implemented. Developed custom RESTful API to enable external web application to access hangman's user data.

Main Technologies: JavaScript, HTML, CSS, Bootstrap, Firebase, AWS

#CANWETALK (2018)

A hackathon project. A Google Assistant voice skill made for people suffering from depression. I was responsible for handling interaction between the user and Google Assistant.

Main Technologies: Google Cloud Platform, Dialogflow, Node.js, JavaScript, HTML, CSS

DECISION TREE (2018)

On request of a startup called "Decision Tree", developed a Google Assistant voice skill using their API that functions like their website.

Main Technologies: Google Cloud Platform, Dialogflow, Node.js

FRAME GROWTH (2018)

Worked together with a startup "Frame Growth" to develop their company website.

Main Technologies: HTML, CSS, JavaScript, jQuery, HubSpot, Bootstrap

THE NEW (2017)

Used New Westminster's open data to create an android app that provides building locations in New Westminster.

Main Technologies: Android Studio, Java, xml, JavaScript, Google Map

VOLUNTEER EXPERIENCE

MAC DEVOPS DAY (JUN 2018 ~ JUN 2018)

Volunteered as a staff at Mac DevOps Day which was located in SFU Harbour Centre
